The story of the title

FROM THE ODYSSEY

Odysseus and his men stayed with Aeolus, the keeper of the winds. After they relaxed for a month, Aeolus gave them a bag with the four winds so that they could return home. He left only the west wind open so that it could blow them straight home. The west wind blew for many days, until they finally almost reached home. However, Odysseus fell asleep, and his men, thinking the bag had treasure in it, opened it up and let out the other three winds (North, East, South). They were blown in all directions and ended up back at

Aeolus' kingdom.
